(b) Explain how the Program or Project will benefit the Navajo Nation, Navajo communities, or the Navajo People:

With a few projects completed within the Chapter boundary and with the pipeline project moving forward for clean drinking water, solving the problems of poor water quality, water smells, corroded pipes and outages provide the Departments opportunity to begin collecting revenue and managing the operation and maintenance.

Part 2. Expenditure Plan details. (a) Describe the Program(s) and/or Project(s) to be funded, including how the funds will be used, for what purposes, the location(s) to be served, and what COVID-related needs will be addressed:

This project will support the reorganization of the To'Hajiilee Navajo Chapter Water Department. During the past few years, the water Department has been struggling to keep the system running and providing potable water to our members. Due to the lack of funds to pay for staff, and the general operation and maintenance expenses. We are currently working on systems improvements and repairs therefore with the requested funding, we will be able to support the management and operation of the water system including billing and accounting, and emergency repairs as needed to keep the system running and in compliance with the drinking water regulations increasing our capacity for providing clean safe water to our members. The project will allow our community continued access to potable water helping the implementation or sanitation practices that are fundamental in preventing additional cases of COVID-19.

(b) Explain how the Program or Project will benefit the Navajo Nation, Navajo communities, or the Navajo People:

The To'Hajiilee Water Department has not fully provided good quality drinking water to the members for years prior to recent improvements and the To'Hajiilee-Albuquerque pipeline projects currently under construction. The community's single operating well #5 produces poor quality water that is brown or black, highly corrosive, smells bad, and has failed a number of times in the past 20 years leaving the community without water for days to weeks. The water quality has caused the loss of revenue for the department, and therefore, the department has not had the funds to pay for the staff and basic operation and maintenance needs. After COVID-19, the loss incurred has been even higher, leaving the department with very little funds to keep the system operating. However, the few projects to improve the system completed within the Chapter boundary and the To'Hajiilee-ABCWUA transmission pipeline project moving forward, which will solve the problems of poor water quality, water smells, corroded pipes and outages, provide the Departments the opportunity to implement best management practices that will improve management, operation and maintenance of the system.

(c) A prospective timeline showing the estimated date of completion of the Project and/or each phase of the Project. Disclose any challenges that may prevent you from incurring costs for all funding by December 31, 2024 and/or fully expending funds and completing the Program(s) or Project(s) by December 31, 2026:

Funds will be encumbered by December 2024 and expended by December 2026

(d) Identify who will be responsible for implementing the Program or Project:
